

1. **Chiung-Wei Huang** and Chung-Chin Kuo. Flow– and voltage–dependent blocking effect of ethosuximide on the inward rectifier K⁺ (Kir2.1) channel. The 30th Joint Annual Conference of Biomedical Science, Taipei (Apr, 2015).
2. **Chiung-Wei Huang** and Chung-Chin Kuo. Flow– and voltage–dependent blocking effect of anti-seizure drugs on the inward rectifier K⁺ (Kir2.1) channel. *Biomedical Research Symposium of National Health Research Institutes and Dr. Monto Ho Memorial Symposium*, National Health Research Institutes, Zhunan Township (Jul, 2014).
3. **Chiung-Wei Huang** and Chung-Chin Kuo. The bundle crossing region is responsible for the inwardly rectifying internal spermine block of the Kir2.1 channel. *The 29th Joint Annual Conference of Biomedical Science, Taipei* (April, 2014).
4. Y.L. Hsieh, S.S. Chen, **Chiung-Wei Huang**. Peripheral Ultrasound Stimulation Reorganizes the Distribution of Spinal c-fos Immunoreactivity Induced by Early or Late Phase of Inflammation. *2005 Symposium on Annual Conference of Physical therapy, Kouhsiung* (Mar, 2005).
5. **Chiung-Wei Huang**, D.C. Wang, S.S. Chen and T.J. Chen. Neuronal nitric oxide synthase implicated in the neuronal plasticity occurred in cochlear nucleus following cochlear ablation. *Symposium on Tissue Remodeling : Growth, Apoptosis and Differentiations, Tainan* (Oct, 2002).
6. **Chiung-Wei Huang**, D.C. Wang, S.S. Chen and T.J. Chen. Redistribution of nNOS in the Cochlear Nucleus following Cochleotomy. *The 17th Joint Annual Conference of Biomedical Science, Taipei* (April, 2002).
